

Thanks to the gracious efforts of local people in the Morgantown community, we are well on our way to building a new Children's Service, Teaching & Research Hospital in India. The Eye Foundation of America has raised \$750,000 from local people to build The Coutami Eye Institute. The EFA has been working with the Rotary Club since 1979

The temporary hospital in India, where teaching and service to the community has already begun.

Morgantown, West Virginia
Ophthalmologist
V.K. Raju, M.D.

This is a global effort to prevent blindness in a world where access to eye care is tough. Currently, the hospital staff is working in a temporary facility where doctors from seven countries (sponsored by ORBIS International) are trained by the hospital. The new facility can make it possible to train ophthalmologists from 51 countries to care for children across the globe

For 30 years, Dr. Raju has been volunteering his time and finances to 23 countries, including USA with the objective of providing world-class eye care to the impoverished and to those without access to care.

"Working with other organizations is our strength."

Dr. V.K. Raju would like to acknowledge the following individuals for their contributions & work for the Eye Foundation of America:
